

# *Dream Day*

*Tom Mody*

---

You found that which was left behind  
You've paid back all your borrowed time  
The gifts you gave have been returned  
Your pennies saved now fortunes earned  
There is no love you can't express  
There is no power you don't possess  
So daddy's little girl stayed young  
And there was more for everyone

[chorus]

When your stars collide  
And everything's renewed inside  
A universe has come alive  
You're living in your dream day  
It's brighter than a thousand suns  
But precious to just the one  
I give to you  
A gift to you  
Your Dream Day

Few words you speak can say it all  
New worlds you seek will never fall  
The nights are long so enjoy the rest  
The meaning of dreams don't second guess  
No need to ask why you've received.  
No need to question what you believe  
So Mommy's little boy got his smile  
And there was more than just a little while

[repeat chorus]

The tears you've cried no drop a waste  
They flowed a path to a better place  
The ties that bind have been undone  
Except the ones you've tied with love  
So walk forward into your past  
And grab the things you meant to last  
These chances come but once a dream  
One chance to redeem

[repeat chorus]
