

Remember Me

Tom Mody

You will always
You will always
You will always
Be in my heart
[repeat]

I just want you to know I love you
And I've fallen for your every move
Can't break the barriers to make it through
So please remember me.

[chorus]
You will always
You will always
You will always
Be in my heart
[repeat]

I've been lonely for the longest time
Never knowing how to make you mine
Feel my presence from light left behind
And you'll remember me

[chorus repeat]

[bridge]
I can not stay if you don't feel me
I'll float away yet never be free
It is my love that is the energy
You can't explain
You can't deny

[chorus repeat]

From the moment you came to this place
Casting shadows on my empty space
I've so subtly kept you displaced
So you'd remember
I just want you to know I love you
And I've fallen for your every move
Can't break the barriers to make it through
So please remember me
